

Enhancing Civic Engagement with Secure Digital Experiences

TECKpert’s WordPress VIP Design & Development provides website design, development, modernization, and security leveraging the FedRAMP-authorized WordPress VIP platform, tailored specifically for government agencies.

What is WordPress VIP?

WordPress VIP is an enterprise content management system.

Built and supported by Automattic, the company that created WordPress, the most popular CMS for websites in the world, powering over 63% of all websites that use a CMS.

WordPress VIP meets the advanced requirements of public sector agencies, offering features such as enhanced security, **enterprise-grade** infrastructure, personalized support, and performance optimization for mission critical websites.

A robust, **Agile** content platform empowers agencies with the flexibility to create dynamic digital experiences using their preferred technologies and tools, all while ensuring enterprise-grade IT management and security. This approach allows agencies to focus on innovation and user experience, without compromising on security or operational efficiency.

WordPress VIP is **FedRAMP** authorized, and cloud data centers hold SSAE 18 SOC 1, SSAE SOC 2 certifications.

Used by the US Government, including the White House and NASA, as well as Fortune 500 companies.

Why WordPress VIP?

Communications and Content Teams

Ease of Use: WordPress VIP’s intuitive interface makes content creation, editing, and publishing simple, even for non-technical teams.

Agile Content Delivery: Quickly deploy updates and new content across multiple channels, ensuring your message reaches the public promptly.

Scalable and Flexible: Easily manage high traffic and media-rich content while maintaining fast load times.

Personalized Support: Access dedicated, expert support to ensure seamless content operations.

IT Teams

Enterprise-Grade Security: Benefit from FedRAMP authorization, SOC 1, and SOC 2 certifications for top-level security.

Performance Optimization: Robust infrastructure ensures reliable uptime, scalability, and fast load times, even under peak traffic.

Custom Development: Leverage custom plugin and theme development while maintaining compatibility with VIP’s secure environment.

DevSecOps Practices: Integrated DevSecOps throughout development and operations ensures secure, compliant software delivery.

TECKpert WP VIP Design and Development Services

TECKpert’s WordPress VIP Design & Development services offer secure, scalable, and user-friendly solutions for federal, state, and local government agencies. We focus on delivering websites built on the FedRAMP-authorized WordPress VIP platform, ensuring the highest levels of security. Our expertise includes custom development, accessibility compliance, and migrating legacy systems. With a skilled team, we cover everything from UX design to DevSecOps, providing robust digital solutions that enhance public engagement and improve agency efficiency.

- ✓ **Website Design and Development:** Creating modern, responsive, and accessible websites that meet the unique needs of federal, state, and local agencies.
- ✓ **IT Staff Augmentation:** Providing skilled IT professionals to support the implementation and management of WordPress VIP solutions.
- ✓ **DevSecOps:** Integrating security practices into the development and operations processes to ensure robust and secure software delivery.
- ✓ **Software Modernization:** Upgrading legacy content management systems to WordPress VIP’s modern and secure FedRAMP authorized platform.
