Where Modernization and Innovation Meet to Drive Mission Success

IT Staff Augmentation	Municipal ERP Total Transformation
At TECKpert, we recognize that securing the right talent is essential for government agencies to achieve their mission-critical objectives. Through our IT Staff Augmentation services, we streamline the process of recruiting, vetting, and managing skilled IT professionals for short and long-term projects.	Our Solution provides local governments with comprehensive support from initial assessment to final implementation of ERP systems. Tailored specifically for municipal needs, our services ensure seamless integration, modernization, and optimization of your ERP and departmental applications.
Cybersecurity for Local Government	**Fractional CIO/CTO Services**
TECKpert's CEPS™ service is tailored to meet the unique cybersecurity needs of local governments. Our service provides a comprehensive approach to cybersecurity, offering education, planning, and support to enhance cyber resilience and safeguard sensitive information.	When your organization is in transition or requires leadership on a short-term or interim basis, TECKpert provides Fractional Leadership solutions tailored to your specific needs. Our Fractional Services cover a range of key leadership roles in technology, cybersecurity, and program management.

Why TECKpert?

We utilize 100% **US-based talent** for all our projects ensuring high-quality, dependable, and secure services.	TECKpert employs **agile methodologies**, allowing us to be flexible and responsive to project requirements.
We take a **client-centric** approach to prioritize our clients' needs, goals, and requirements to deliver tailored solutions.	We have established strong partnerships with **leading technology** providers, giving us access to the latest tools and platforms.

Key Achievements

Successfully delivering **IT Staff Augmentation** services across multiple contracts for state and local agencies in Florida, with a combined contract ceiling exceeding $300 million.

Led the assessment and implementation of the design for the **Digital Transformation** for two Florida municipalities.

Provided **Software DevOps** for local Florida county using **Microsoft PowerApps**, Power Automate, and SharePoint to streamline workflows and enhance team collaboration.

Built a web services application framework using AWS (Cognito, RDS, Lambda) with NodeJS, React, and C#, providing **DevSecOps** for a private firm's public facing internet portal.

Created an **AI** tool for internal software used to source and match talent to client requirements.
